Capybera Cheat Sheet

by alexey. via cheatography.com/26454/cs/9082/

Navigating

visit('/projects')

visit(post_comments_path(post))

Clicking Buttons & Links

click_link('id-of-link')

click_link('Link Text')

click_button('Save')

click('Link Text')
# Click either a link or a button

click('Button Value')

Sync, Async & Wait...

Capybara automatically waits for asynchronous operations to complete. When you try to find an element that isn't on the page, it waits and retries until it is there, or a timeout duration elapses. The wait time is defined at Capybara.default_wait_time

Here are the methods that waits:

find(selector), find_field, find_link within(selector)(scoping) *has_selector?/has_no_selector? & assertions form & link actions click_link/button fill_in check/uncheck, select, choose

Here are the methods that doesn't wait:

visit current_path all (selector) first(selector) execute_script simple accessors: text, value, title, etc.

Interacting with forms

fill_in('First Name', :with => 'John')

fill_in('Password', :with => 'Seekrit')

fill_in('Description', :with => 'Really Long Text…')

choose('A Radio Button')

choose("radio_group_selector", option: "-Option 5")

check('A Checkbox')

uncheck('A Checkbox')

attach_file('Image', '/path/to/image.jpg')

select('Option', :from => 'Select Box')

Scoping

```
within("//li[@id='employee']") do
  fill_in 'Name', :with => 'Jimmy'
end
```

```
within(:css, "li#employee") do
  fill_in 'Name', :with => 'Jimmy'
end
```

```
within_fieldset('Employee') do
  fill_in 'Name', :with => 'Jimmy'
end
```

```
within_table('Employee') do
  fill_in 'Name', :with => 'Jimmy'
end
```
