

Margins

<code>class="m-2 "</code>	Margin
<code>class="mt-2 "</code>	Margin Top
<code>class="mb-2 "</code>	Margin Bottom
<code>class="ml-2 "</code>	Margin Left
<code>class="mr-2 "</code>	Margin Right
<code>class="me-2"</code>	Margin End
<code>class="ms-2"</code>	Margin Start
<code>class="me-auto"</code>	Margin End Auto
<code>class="ms-auto"</code>	Margin Start Auto

Paddings

<code>class="p-2"</code>	Padding
<code>class="pt-2"</code>	Padding Top
<code>class="pb-2"</code>	Padding Bottom
<code>class="pl-2"</code>	Padding Left
<code>class="pr-2"</code>	Padding Right
<code>class="py-2"</code>	Vertical Padding
<code>class="px-2"</code>	Horizontal Padding
<code>class="pe-2"</code>	Padding End
<code>class="ps-2"</code>	Padding Start

Visibility and Hiding

<code>class="visible-sm"</code>	Makes the element visible on a specific screen size. For example, .visible-sm is only visible on small screens.
<code>class="hidden-lg"</code>	Hides the element on a specific screen size. For example, .hidden-lg hides on large screens.
<code>class="d-none"</code>	Hides the element completely. It is not visible on any screen size.
<code>class="d-block"</code>	Makes the element visible at the block level. (Default)

Visibility and Hiding (cont)

<code>class="d-inline"</code>	Makes the element visible at the inline level.
<code>class="d-inline-block"</code>	Makes the element visible at the inline block level.
<code>class="d-sm-none"</code>	Hides the element on a specific screen size.

Width and Height

<code>class="w-2"</code>	Width
<code>class="mw-2"</code>	Max-Width
<code>class="min-w-2"</code>	Min-Width
<code>class="h-2"</code>	Height
<code>class="mh-2"</code>	Max-Height
<code>class="min-h-2"</code>	Min-Height
<code>class="lh-2"</code>	Line Height

Font Style

<code>class="fw-2"</code>	Font Weight
<code>class="fs-2"</code>	Font Size
<code>class="text-color"</code>	Text Color

Layout

<code>class="container"</code>	Creates a content container.
<code>class="row"</code>	Creates a line.
<code>class="col-sm"</code>	Creates a column.
<code>class="gap"</code>	Determines the space between Margin and Padding
<code>class="sticky-top"</code>	Makes the element sticky at the top of the page.

D-Flex

<code>class="d-flex"</code>	Specifies the item as a flex container.
<code>class="d-inline-flex"</code>	Specifies the element as an inline flex container.

D-Flex (cont)

<code>class="flex-grow-2"</code>	Determines the growth rate of an item.
<code>class="flex-shrink-2"</code>	Determines the shrinkage rate of an element.
<code>class="flex-grow-2"</code>	Determines the growth and contraction rates of an element.
<code>class="flex-wrap"</code>	When sorting items in a flex container, it allows them to slide to the next line if they do not fit on the screen.
<code>class="flex-column"</code>	Vertical alignment
<code>class="flex-width"</code>	Specifies that the element has a fixed width.

Justify Content (Horizontal Alignment)

<code>class="justify-content-start"</code>	Aligns elements horizontally at their starting position.
<code>class="justify-content-end"</code>	Aligns elements in their final position horizontally.
<code>class="justify-content-center"</code>	Centers elements horizontally.
<code>class="justify-content-between"</code>	Aligns elements evenly spaced horizontally.
<code>class="justify-content-around"</code>	Aligns items evenly spaced around them horizontally.

Align Items

<code>class="align-items-start"</code>	Aligns items vertically at their starting position.
--	---

Align Items (cont)

class="align-items-end" Aligns items vertically in their final position.

class="align-items-center" Centers elements vertically.

class="align-items-baseline" Aligns elements vertically to the text base.

class="align-items-stretch" Aligns items by expanding them vertically.

Align Contents

class="align-content-start" Aligns items in a multi-row container vertically at the starting position.

class="align-content-end" Aligns items within a multi-row container vertically at their final position.

class="align-content-center" Vertically centers items within a multi-row container.

class="align-content-between" Aligns items within a multi-row container evenly spaced vertically.

class="align-content-around" Aligns items within a multi-row container at equal intervals around the vertical.

class="align-content-stretch" Aligns items within a multi-row container by expanding them vertically.
