

Basic terms of phonetics

Schematic knowledge vs Linguistic knowledge

Schematic knowledge

Any knowledge which deals with external structure of the language.

Linguistic knowledge

Linguistic knowledge is represented as a system of constraints, a grammar, which defines all and only the possible sentences of the language.

Discourse analysis

Discourse analysis is a research method for studying written or spoken language in relation to its social context. It aims to understand how language is used in real-life situations.

Examples of phonology

Phonology - language-specific selection and organisation of sounds to signal meanings

Example:

"snill" - sounds all right

"fnill" - just sounds wrong

Vernacular accent

Definition

Speaking in accent, using a language or dialect native to a region or country rather than a literary, cultured, or foreign language.

Discourse analysis

Appropriateness vs Accuracy of language

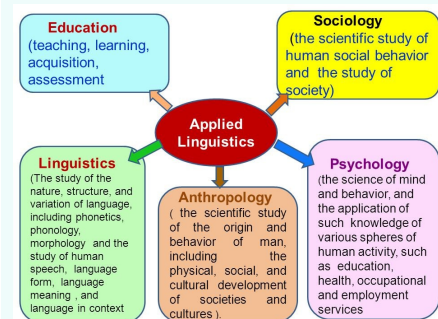

Appropriateness

Using appropriate language means that a speaker's language is suitable or fitting for themselves, as the speaker; our audience; the speaking context; and the speech itself.

Accuracy

Accuracy refers to how correct learners' use of the language system is, including their use of grammar, pronunciation and vocabulary.
